

2014 Cooperative Ed Serv Agcy 11 Youth Risk Behavior Survey

Executive Summary

This report contains findings from the 2013 Wisconsin YRBS, which is the most recent statewide data, as well as your local data. The Department of Public Instruction (DPI) has administered the YRBS every two years beginning with 1993. The Wisconsin survey results are representative of ninth through twelfth grade public high school students in Wisconsin. The Cooperative Ed Serv Agcy 11's data in this report was collected using the Department of Public Instruction's Online YRBS Administration site.

Traffic Safety

Wisconsin Highlights

Motor vehicle crashes are the leading cause of death among youth (5-17 year olds) in Wisconsin. Fortunately, we have seen a significant increase in the percentage of Wisconsin high school students who report wearing a seat belt and not being a passenger in a car driven by someone who has been drinking alcohol. Unfortunately, a significant percentage of high school students report drinking and driving, not consistently wearing a seat belt and texting while driving.

2013 Wisconsin High School YRBS Highlights*

- During 1993-2013, a significant decrease occurred in the percentage of students who reported never or rarely wearing a seat belt when riding in a car driven by someone else (29%-8%).
- Almost one out of five students reported riding with a driver who had been drinking alcohol at least once in the past 30 days (21%).
- Seven percent of 11th grade students and 15% of 12th grade students reported driving after drinking alcohol at least once in the last 30 days (9% of all students).
- Nearly half of all students who drove a car or other vehicle during the past 30 days reported texting while driving (48%).

2014 Cooperative Ed Serv Agcy 11 Highlights

- 4.4% of students reported having never or rarely wore a seat belt when riding in a car driven by someone else.
- 18.3% of students reported having rode in a car or other vehicle driven by someone who had been drinking alcohol one or more times during the past 30 days before the survey.
- 5.5% of students reported having drove a car or other vehicle when they have been drinking alcohol during the past 30 days before the survey.
- 33.6% of students who texted or emailed while driving a car or other vehicle in the past 30 days

2014 Cooperative Ed Serv Agcy 11 Survey Results by Gender

	Males	Females
Percentage of students who never or rarely wore a seat belt when riding in a car driven by someone else.	5.7%	3%
Percentage of students who rode in a car or other vehicle driven by someone who had been drinking alcohol one or more times during the past 30 days.	18.1%	18.6%
Percentage of students who drove a car or other vehicle when they have been drinking alcohol during the past 30 days.	6.5%	4.4%
Percentage of students who texted or emailed while driving a car or other vehicle in the past 30 days	33.8%	33.4%

Weapons

Wisconsin Highlights

2013 Wisconsin High School YRBS Highlights*

- The percentage of high school students who reported carrying a weapon, including a gun, both anywhere and on school property decreased significantly from 1993 to 2013.
- The percentage of males carrying a weapon increased from 17% in 2011 to 24% in 2013.

2014 Cooperative Ed Serv Agcy 11 Highlights

- 22.1% of students reported having carried a weapon, such as a gun, knife, or club, during the past 30 days before the survey.
- 3.4% of students who have carried a weapon, such as a gun, knife, or club, on school property during the past 30 days.
- During the past 30 days before the survey, 4.9% of students reported staying home from school because they felt they would be unsafe at school or on their way to or from school.

Violence: Physical Fighting

Wisconsin Highlights

A majority of Wisconsin high school students report feeling safe at school and they report fewer incidents of violence at school than not at school. However, a significant number of students report being harassed and bullied while at school, and violence is an issue of concern for many high school students.

2013 Wisconsin High School YRBS Highlights*

- Reports of physical fighting, including on school property decreased significantly from 1993 to 2013.

2014 Cooperative Ed Serv Agcy 11 Highlights

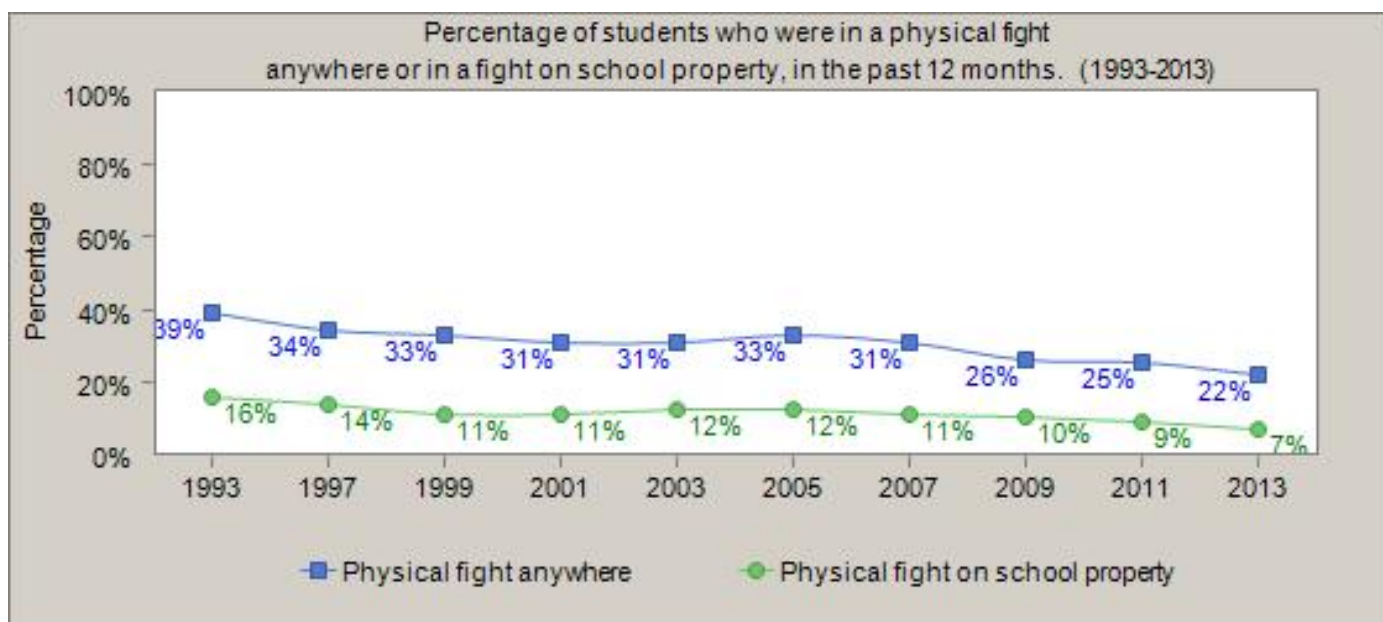

- 17% of students reported having been in a physical fight during the past 12 months.
- 7.7% of students reported having been in a physical fight on school property during the past 12 months.

Violence: Threats and Personal Safety

2013 Wisconsin High School YRBS Highlights*

- 14% of students reported that someone tried to hurt them by hitting, punching, or kicking them while at school.
- 6% of students reported not going to school in the past month because they felt unsafe at school or on their way to or from school.
- One out of five high school students (21%) believed that violence was a problem at their school.
- Female students were significantly more likely than males to report being forced, either verbally or physically, to take part in a sexual activity (11% compared to 4%).

2014 Cooperative Ed Serv Agcy 11 Highlights

- 15.7% of students reported having someone try to hurt them by hitting, punching, or kicking them while on school property during the past 12 months.
- 9.3% of students agreed that violence is a problem at their school.
- 6.5% of students who have been forced, either verbally or physically, to take part in sexual activity.

Bullying

Wisconsin Highlights

- Twenty-three percent of high school students reported being bullied on school property.
- Eighteen percent of high school students were electronically bullied anywhere during the past 12 months.
- Over one-third of male students (38%) and approximately one-half of female students (53%) believed that harassment and bullying were a problem at their school.

2014 Cooperative Ed Serv Agcy 11 Highlights

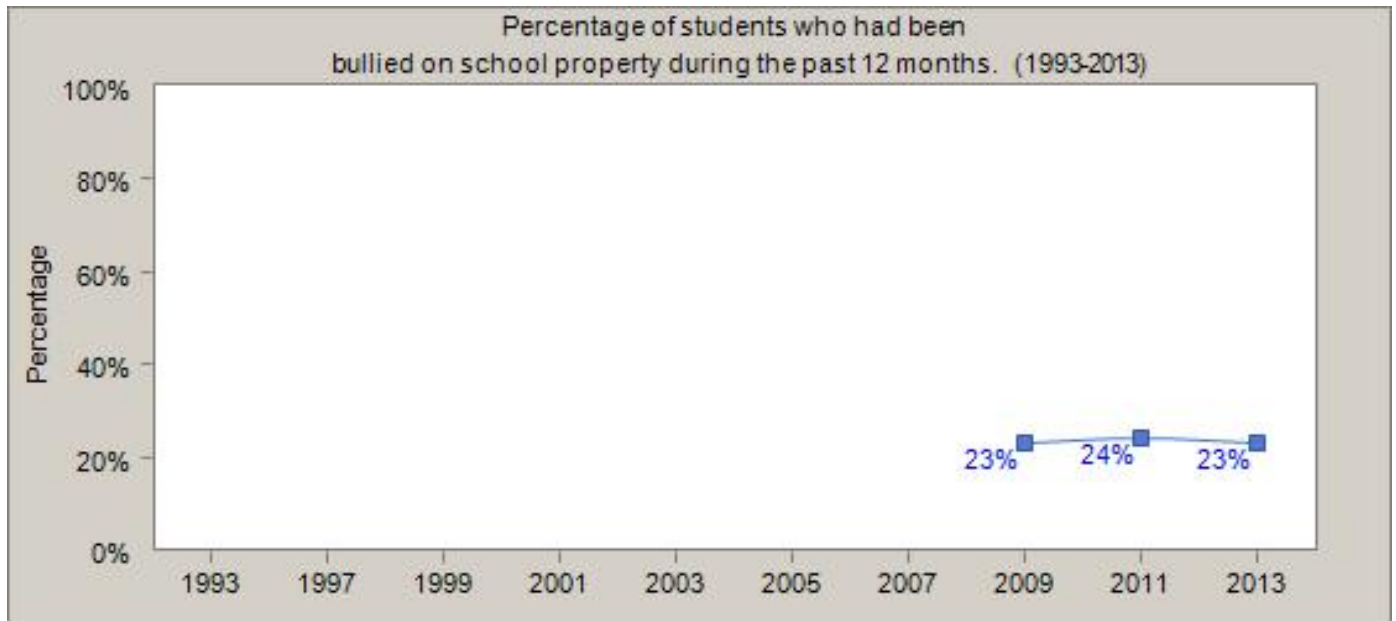

- 24.3% Bullied on school property in the past 12 months.
- 16% of students who had even been electronically bullied during the past 12 months
- 30.8% of students agreed that harassment and bullying is a problem at their school.

Suicide

Wisconsin Highlights

The youth suicide rate in Wisconsin consistently exceeds the national average. Wisconsin YRBS data indicate a downward trend in the percentage of students who report feeling sad or hopeless and those seriously considering suicide.

2013 Wisconsin High School YRBS Highlights*

- Twenty-five percent of high school students reported feeling sad or hopeless almost every day for two weeks or more in a row in the past 12 months.
- During 1993-2013, a significant decrease occurred in the percentage of students who reported having seriously considered suicide in the past 12 months (27%-13%).
- The percentage of students who reported making a plan about how they would attempt suicide decreased from 15% in 2005 to 12% in 2013.
- Students who reported attempting suicide in the past 12 months decreased from 1999 to 2013 (8%-6%).

2014 Cooperative Ed Serv Agcy 11 Highlights

- 22.1% of students who felt so sad or hopeless almost every day for two weeks or more in a row that they stopped doing some usual activities.
- 12% of students who seriously considered attempting suicide in the last 12 months.
- 8.1% of students who made a plan about how they would attempt suicide in the last 12 months.
- 3.7% of students who attempted suicide at least once in the past 12 months.

Tobacco Use

Wisconsin Highlights

The trend of decreasing cigarette and other tobacco use among Wisconsin high school students now stretches over a decade. Since 1993, Wisconsin has seen a significant decrease on most measures of tobacco use on the YRBS.

2013 Wisconsin High School YRBS Highlights*

- In 2013, 33% of high school students reported trying a cigarette at least one time in their life compared to 64% in 2001.
- The prevalence of students who smoked a cigarette before the age of 13 decreased from 27% in 1993 to 7% in 2013.
- During 1993-2013, a significant decrease occurred in the percentage of students who reported smoking a cigarette on one or more of the past 30 days (32%-12%).
- Reports of smoking cigarettes on school property in the past 30 days has decreased from 14% in 1993 to 3% in 2013.

2014 Cooperative Ed Serv Agcy 11 Highlights

- 21.3% of students reported having tried cigarette smoking.
- 4.6% of students reported having smoked a whole cigarette for the first time before age 13 years.
- 9% of students reported having smoked cigarettes, during the past 30 days before the survey.
- 2.6% of students reported having have smoked cigarettes on school property during the past 30 days before the survey.

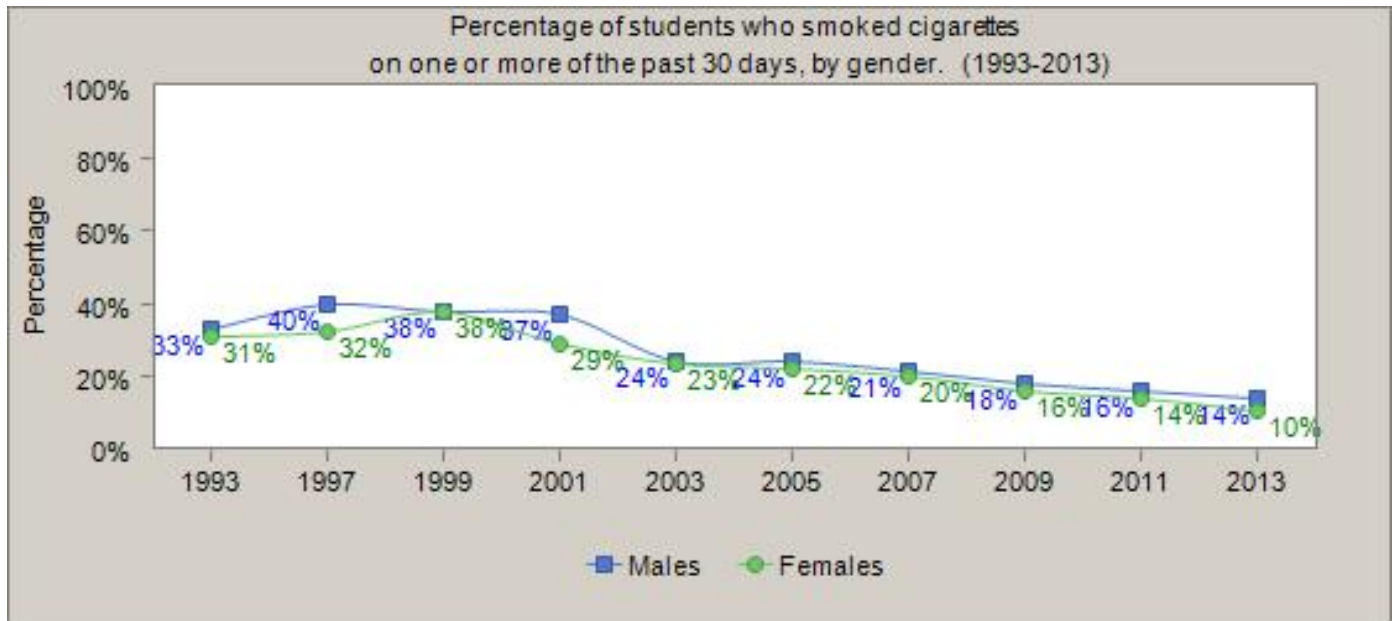

2014 Cooperative Ed Serv Agcy 11 Survey Results by Gender

Alcohol Use

Wisconsin Highlights

In 2013, a large percentage of Wisconsin high school students reported drinking alcohol. The percentage of students reporting binge drinking (five or more drinks of alcohol in a row) in Wisconsin is higher than many states.

2013 Wisconsin High School YRBS Highlights*

- During 1993-2013, a significant decrease occurred in the percentage of students who reported drinking alcohol in the past 30 days (48%-33%).
- Eighteen percent of students reported binge drinking (five or more drinks of alcohol in a row) in the past 30 days, including 22% of 11th grade and 28% of 12th grade students.

2014 Cooperative Ed Serv Agcy 11 Highlights

- 27.4% of students reported drinking alcohol during the last 30 days.
- 14% of students reported having had 5 or more drinks of alcohol in a row (binge drinking) during the past 30 days before the survey.

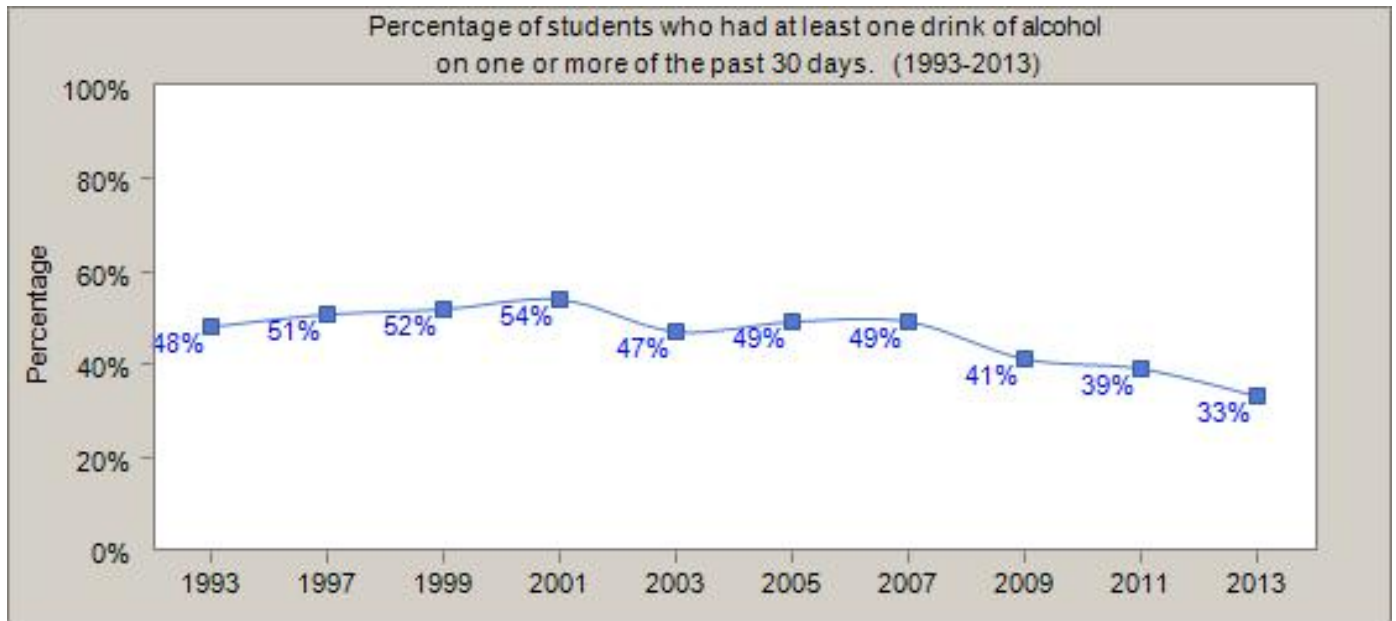

2014 Cooperative Ed Serv Agcy 11 Survey Results by Gender

Marijuana Use

Wisconsin Highlights

2013 Wisconsin High School YRBS Highlights*

- The prevalence of marijuana use has decreased between the years 1999-2013.
- Students who reported using marijuana at least once in their life has decreased significantly from 39% in 1999 to 31% in 2013.
- One out of six students reported using marijuana one or more times in the past 30 days (17%).

2014 Cooperative Ed Serv Agcy 11 Highlights

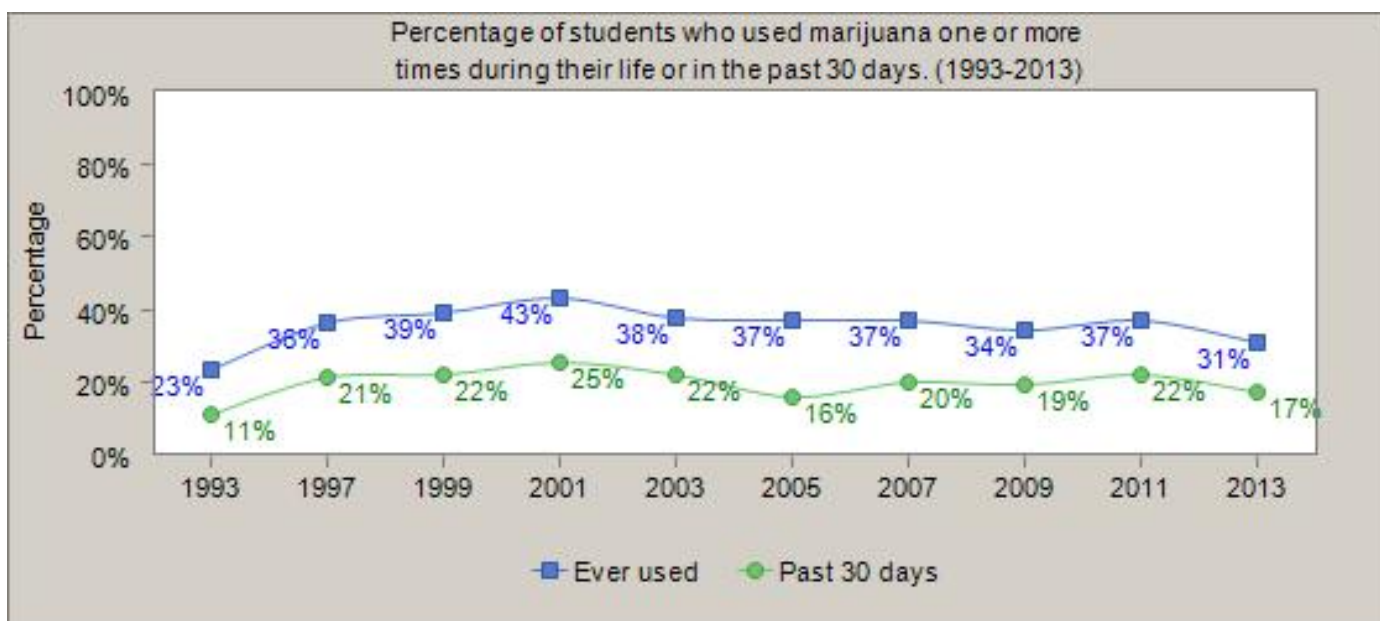

- 20.1% of students reported having tried marijuana at least once in their life.
- 11.6% of students reported having tried marijuana during the last 30 days.

* Weighted data, 9th-12th grade public high school students, percentage for the overall sample.

Nutrition and Exercise

Wisconsin Highlights

Overall, Wisconsin high school students report inadequate levels of physical activity, consumption of breakfast, and fruits and vegetables. The percent of overweight and obese high school students, as measured on the YRBS, has not changed since 1999.

2013 Wisconsin High School YRBS Highlights*

- One-fourth of high school students are overweight or obese according to their height and weight (self-reported) for their age. Males are more likely to be obese compared to females (15%:8%).
- One out of two students did not eat breakfast on five or more days in the past seven days.
- Only seven percent of students reported eating vegetables three or more times per day over the last week.
- 20% of students reported drinking one or more cans, bottles, or glasses of pop per day over the last seven days. Males were significantly more likely to drink pop compared to females (24%:15%).
- The percentage of students who reported being physically active 60 or more minutes per day on five or more of the past seven days increased significantly from 35% in 2005 to 50% in 2013. Females were significantly less likely to report being physically active compared to males (44%:55%).
- Nearly one out of four (23%) students reported watching TV for three or more hours per day on an average school day.
- From 2007 to 2013, the percentage of students who played video and computer games or used a computer for three or more hours for non school work increased significantly from 20% to 34%. The percentage of females reporting use increased from 17% in 2011 to 35% in 2013.

2014 Cooperative Ed Serv Agcy 11 Highlights

- 40.1% of students reported trying to lose weight.
- 20.1% of students reported drinking a can, bottle, or glass of soda or pop one or more times per day during the past seven days.
- 62.2% of students who were physically active for a total of at least 60 minutes per day on five or more of the 7 days before the survey.
- 18.6% of students reported watching television 3 or more hours per day on an average school day.
- 30.9% of male students reported playing video or computer games or used a computer for something that was not school work 3 or more hours per day on an average school day, compared to 24.3% of females.

* Weighted data, 9th-12th grade public high school students, percentage for the overall sample.

Social Support

Wisconsin Highlights

A youth's behavior is influenced by a complexity of experiences and influences. Positive influences have been described as assets. These assets have the power to protect youth from risk behaviors as well as promote healthy behaviors. Historically, Wisconsin high school students have reported high levels of assets.

2013 Wisconsin High School YRBS Highlights*

Over the last decade Wisconsin students who reported having:

- Strong family and teacher support and felt connected to their schools were less likely to engage in risky behaviors, including physical fights, carrying a weapon, using tobacco and marijuana, drinking alcohol, and having sex.
- Higher grades (mostly A's and B's) were less likely than those who report lower grades to be involved in risky health behaviors. Examples include drinking alcohol, using marijuana, having sex, carrying a weapon on school property, and fighting. In addition, these students were more likely to report feeling safe at school and less likely to report being threatened or injured with a weapon at school.
- 73% of students reported feeling like they belong at school.
- 74% of students reported that there was at least one supportive teacher or other adult at school.

2014 Cooperative Ed Serv Agcy 11 Highlights

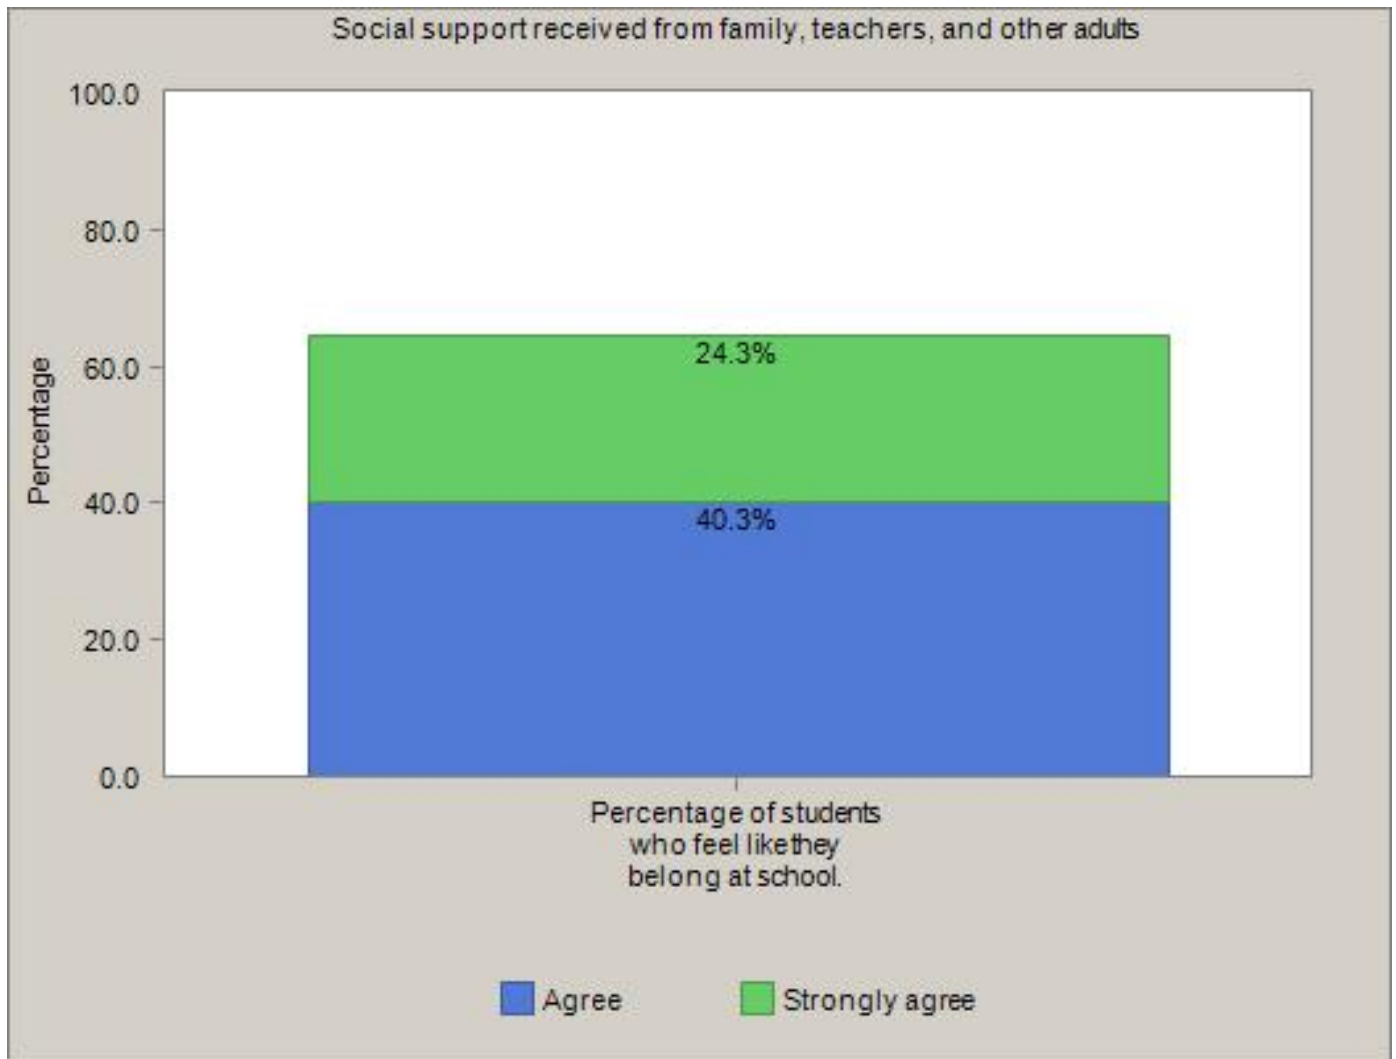

- 64.7% of students reported feeling like they belong at school.
- 68.3% of students who report having at least one teacher or adult in their school that they can talk to if they have a problem.

2014 Saint Croix County Youth Risk Behavior Survey

Executive Summary

This report contains findings from the 2013 Wisconsin YRBS, which is the most recent statewide data, as well as your local data. The Department of Public Instruction (DPI) has administered the YRBS every two years beginning with 1993. The Wisconsin survey results are representative of ninth through twelfth grade public high school students in Wisconsin. The Saint Croix County's data in this report was collected using the Department of Public Instruction's Online YRBS Administration site.

Traffic Safety

Wisconsin Highlights

Motor vehicle crashes are the leading cause of death among youth (5-17 year olds) in Wisconsin. Fortunately, we have seen a significant increase in the percentage of Wisconsin high school students who report wearing a seat belt and not being a passenger in a car driven by someone who has been drinking alcohol. Unfortunately, a significant percentage of high school students report drinking and driving, not consistently wearing a seat belt and texting while driving.

2013 Wisconsin High School YRBS Highlights*

- During 1993-2013, a significant decrease occurred in the percentage of students who reported never or rarely wearing a seat belt when riding in a car driven by someone else (29%-8%).
- Almost one out of five students reported riding with a driver who had been drinking alcohol at least once in the past 30 days (21%).
- Seven percent of 11th grade students and 15% of 12th grade students reported driving after drinking alcohol at least once in the last 30 days (9% of all students).
- Nearly half of all students who drove a car or other vehicle during the past 30 days reported texting while driving (48%).

2014 Saint Croix County Highlights

- 3.9% of students reported having never or rarely wore a seat belt when riding in a car driven by someone else.
- 16.8% of students reported having rode in a car or other vehicle driven by someone who had been drinking alcohol one or more times during the past 30 days before the survey.
- 4.5% of students reported having drove a car or other vehicle when they have been drinking alcohol during the past 30 days before the survey.
- 33.1% of students who texted or emailed while driving a car or other vehicle in the past 30 days

Violence: Physical Fighting

Wisconsin Highlights

A majority of Wisconsin high school students report feeling safe at school and they report fewer incidents of violence at school than not at school. However, a significant number of students report being harassed and bullied while at school, and violence is an issue of concern for many high school students.

2013 Wisconsin High School YRBS Highlights*

- Reports of physical fighting, including on school property decreased significantly from 1993 to 2013.

2014 Saint Croix County Highlights

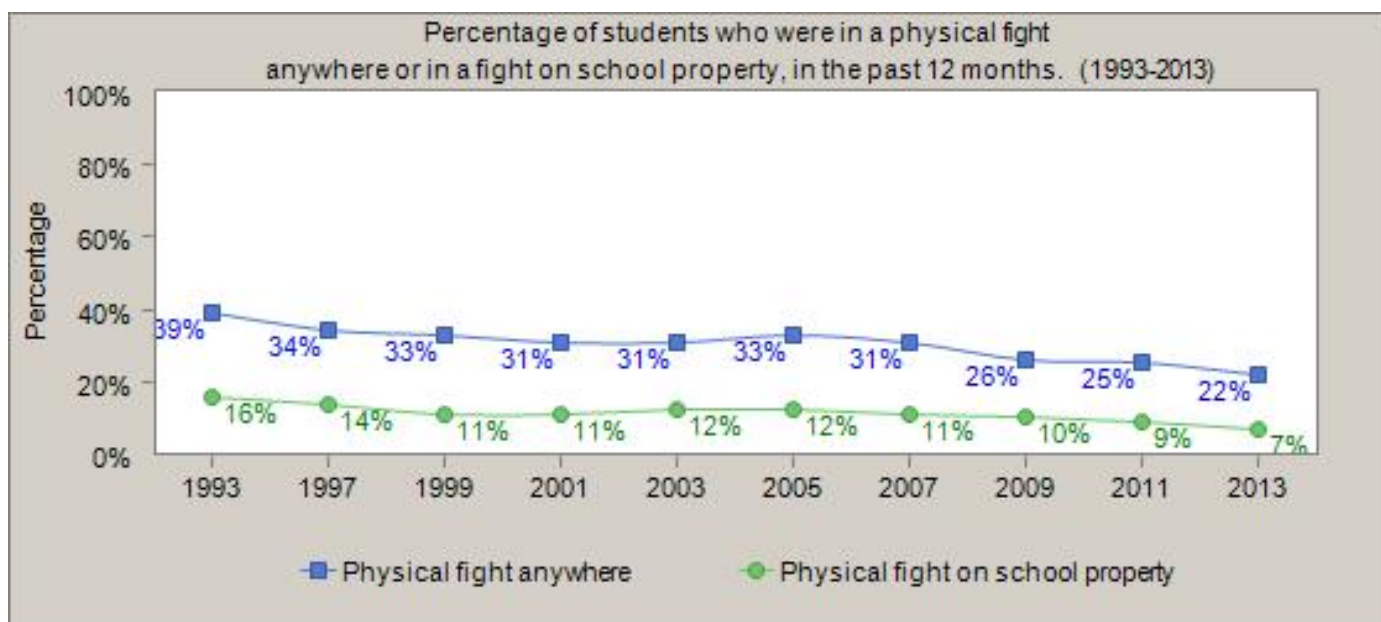

- 18.7% of students reported having been in a physical fight during the past 12 months.
- 7% of students reported having been in a physical fight on school property during the past 12 months.

Suicide

Wisconsin Highlights

The youth suicide rate in Wisconsin consistently exceeds the national average. Wisconsin YRBS data indicate a downward trend in the percentage of students who report feeling sad or hopeless and those seriously considering suicide.

2013 Wisconsin High School YRBS Highlights*

- Twenty-five percent of high school students reported feeling sad or hopeless almost every day for two weeks or more in a row in the past 12 months.
- During 1993-2013, a significant decrease occurred in the percentage of students who reported having seriously considered suicide in the past 12 months (27%-13%).
- The percentage of students who reported making a plan about how they would attempt suicide decreased from 15% in 2005 to 12% in 2013.
- Students who reported attempting suicide in the past 12 months decreased from 1999 to 2013 (8%-6%).

2014 Saint Croix County Highlights

- 23.6% of students who felt so sad or hopeless almost every day for two weeks or more in a row that they stopped doing some usual activities.
- 13.1% of students who seriously considered attempting suicide in the last 12 months.
- 9% of students who made a plan about how they would attempt suicide in the last 12 months.
- 4.6% of students who attempted suicide at least once in the past 12 months.

Tobacco Use

Wisconsin Highlights

The trend of decreasing cigarette and other tobacco use among Wisconsin high school students now stretches over a decade. Since 1993, Wisconsin has seen a significant decrease on most measures of tobacco use on the YRBS.

2013 Wisconsin High School YRBS Highlights*

- In 2013, 33% of high school students reported trying a cigarette at least one time in their life compared to 64% in 2001.
- The prevalence of students who smoked a cigarette before the age of 13 decreased from 27% in 1993 to 7% in 2013.
- During 1993-2013, a significant decrease occurred in the percentage of students who reported smoking a cigarette on one or more of the past 30 days (32%-12%).
- Reports of smoking cigarettes on school property in the past 30 days has decreased from 14% in 1993 to 3% in 2013.

2014 Saint Croix County Highlights

- 24.2% of students reported having tried cigarette smoking.
- 4.3% of students reported having smoked a whole cigarette for the first time before age 13 years.
- 9.3% of students reported having smoked cigarettes, during the past 30 days before the survey.
- 1.8% of students reported having have smoked cigarettes on school property during the past 30 days before the survey.

Alcohol Use

Wisconsin Highlights

In 2013, a large percentage of Wisconsin high school students reported drinking alcohol. The percentage of students reporting binge drinking (five or more drinks of alcohol in a row) in Wisconsin is higher than many states.

2013 Wisconsin High School YRBS Highlights*

- During 1993-2013, a significant decrease occurred in the percentage of students who reported drinking alcohol in the past 30 days (48%-33%).
- Eighteen percent of students reported binge drinking (five or more drinks of alcohol in a row) in the past 30 days, including 22% of 11th grade and 28% of 12th grade students.

2014 Saint Croix County Highlights

- 27.2% of students reported drinking alcohol during the last 30 days.
- 13.4% of students reported having had 5 or more drinks of alcohol in a row (binge drinking) during the past 30 days before the survey.

Sexual Behavior

Wisconsin Highlights

Many of the risky sexual behaviors reported by high school students on the YRBS have decreased significantly since 1993. However, a significant percentage of students are still engaging in risky sexual behaviors and putting themselves at risk for negative health outcomes.

2013 Wisconsin High School YRBS Highlights*

- During 1993-2013, a significant decrease occurred in the percentage of students who reported ever having had sexual intercourse (47%-35%).
- The long-term trend of high school students who reported having had sexual intercourse with at least one partner in the last three months decreased from 33% in 1993 to 26% in 2013.
- The percentage of students who reported sexual intercourse before the age of 13 decreased during 1993-2013 (7%-3%).
- The percentage of students who reported multiple sexual partners (four or more) decreased during 1993-2013 (14%-10%).
- The percentage of students who used a condom during last sexual intercourse increased from 58% in 1993 to 63% in 2013

2014 Saint Croix County Highlights

- 34.1% of students reported ever having sexual intercourse.
- 2.4% of students who had sexual intercourse for the first time before age 13 years.
- 7.5% of students who have had sexual intercourse with 4 or more people.
- 25.1% of students reported having sexual intercourse with 1 or more people in the past 3 months.

Nutrition and Exercise

Wisconsin Highlights

Overall, Wisconsin high school students report inadequate levels of physical activity, consumption of breakfast, and fruits and vegetables. The percent of overweight and obese high school students, as measured on the YRBS, has not changed since 1999.

2013 Wisconsin High School YRBS Highlights*

- One-fourth of high school students are overweight or obese according to their height and weight (self-reported) for their age. Males are more likely to be obese compared to females (15%:8%).
- One out of two students did not eat breakfast on five or more days in the past seven days.
- Only seven percent of students reported eating vegetables three or more times per day over the last week.
- 20% of students reported drinking one or more cans, bottles, or glasses of pop per day over the last seven days. Males were significantly more likely to drink pop compared to females (24%:15%).
- The percentage of students who reported being physically active 60 or more minutes per day on five or more of the past seven days increased significantly from 35% in 2005 to 50% in 2013. Females were significantly less likely to report being physically active compared to males (44%:55%).
- Nearly one out of four (23%) students reported watching TV for three or more hours per day on an average school day.
- From 2007 to 2013, the percentage of students who played video and computer games or used a computer for three or more hours for non school work increased significantly from 20% to 34%. The percentage of females reporting use increased from 17% in 2011 to 35% in 2013.

2014 Saint Croix County Highlights

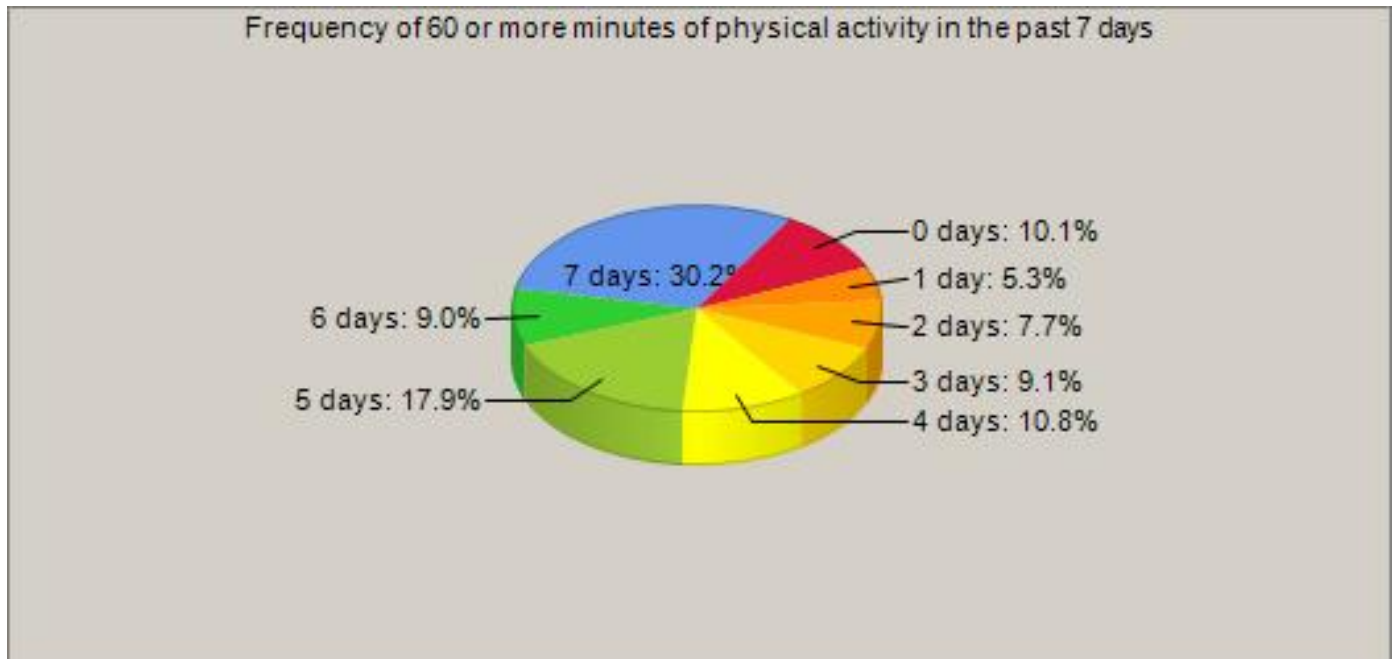

- 42.6% of students reported trying to lose weight.
- 56.6% of students who were physically active for a total of at least 60 minutes per day on five or more of the 7 days before the survey.
- 23% of students reported watching television 3 or more hours per day on an average school day.
- 37.5% of male students reported playing video or computer games or used a computer for something that was not school work 3 or more hours per day on an average school day, compared to 33.7% of females.

Social Support

Wisconsin Highlights

A youth's behavior is influenced by a complexity of experiences and influences. Positive influences have been described as assets. These assets have the power to protect youth from risk behaviors as well as promote healthy behaviors. Historically, Wisconsin high school students have reported high levels of assets.

2013 Wisconsin High School YRBS Highlights*

Over the last decade Wisconsin students who reported having:

- Strong family and teacher support and felt connected to their schools were less likely to engage in risky behaviors, including physical fights, carrying a weapon, using tobacco and marijuana, drinking alcohol, and having sex.
- Higher grades (mostly A's and B's) were less likely than those who report lower grades to be involved in risky health behaviors. Examples include drinking alcohol, using marijuana, having sex, carrying a weapon on school property, and fighting. In addition, these students were more likely to report feeling safe at school and less likely to report being threatened or injured with a weapon at school.
- 73% of students reported feeling like they belong at school.
- 74% of students reported that there was at least one supportive teacher or other adult at school.

2014 Saint Croix County Highlights

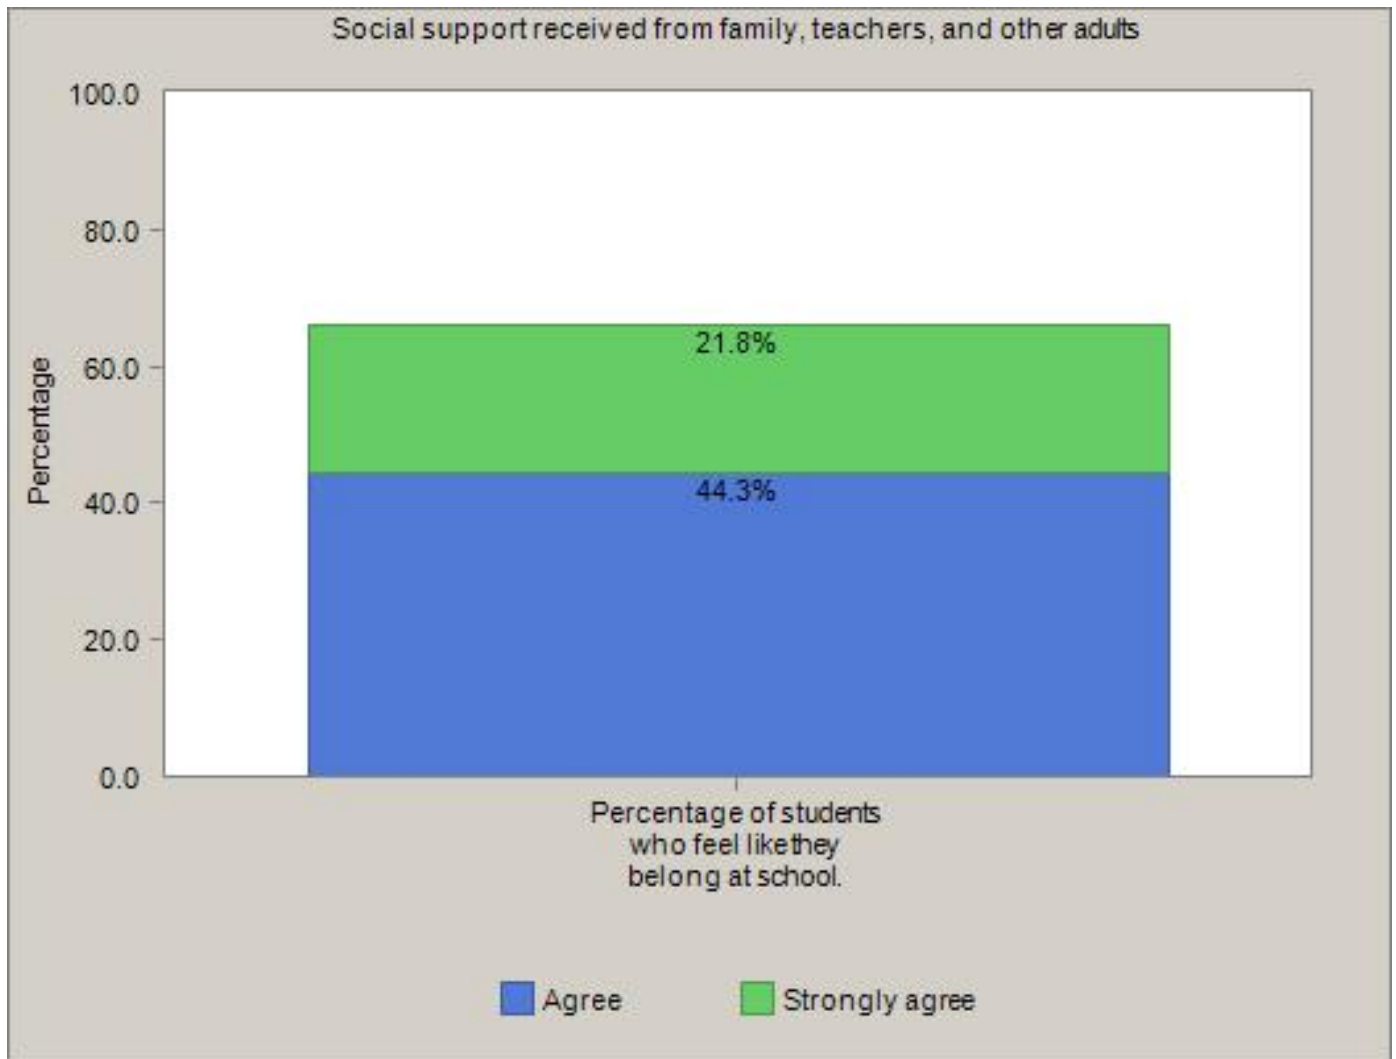

- 66.1% of students reported feeling like they belong at school.
- 75.2% of students who report having at least one teacher or adult in their school that they can talk to if they have a problem.
